DEFINITIONS

In this circular, unless the context otherwise requires, the following expressions shall have the following meanings.

A.

f *h* *g* *e* *d* *c* *b* *a*

$$\begin{array}{ccccc} A_{\epsilon_1, \dots, \epsilon_{i-1}} & \bullet & \bullet & A_{\epsilon_1, \dots, \epsilon_{i-1}} & \bullet \\ & & & & f \\ A_{\epsilon_1, \dots, \epsilon_{i-1}, \epsilon_i} & \bullet & \bullet & & \end{array}$$

1. *Chlorophyll a* (chl *a*) and *Chlorophyll b* (chl *b*) were determined using a spectrophotometer (Shimadzu UV-1601) at 663 nm and 646 nm, respectively. The concentration of chl *a* and chl *b* was calculated using the following equations: chl *a* (mg/L) = 12.7 (OD₆₆₃ - 1.82 OD₆₄₆), chl *b* (mg/L) = 22.9 (OD₆₄₆ - 0.21 OD₆₆₃).

B. 2120)

• ()

1. The first part of the paper is devoted to the study of the asymptotic behavior of the solutions of the system (1) as $\epsilon \rightarrow 0$. It is shown that the solutions of the system (1) converge to the solutions of the system (2) in the sense of the weak convergence in the space $L^2(\Omega; \mathbb{R}^n)$.

LETTER FROM THE BOARD

Figure 1 shows a musical score for a piano piece. The score is written on a grand staff with two staves. The key signature has one sharp (F#), and the time signature is 4/4. The piece begins with a piano (p) dynamic. The first staff contains a series of chords and single notes, while the second staff provides a harmonic accompaniment with chords and moving lines. The score includes various musical notations such as notes, rests, and dynamic markings.

[illegible]

PAYMENT TERMS AND BASIS FOR DETERMINING THE CONSIDERATION

The image displays a musical score for 'The Song of the Lark' by Maurice Strakosck. It features a vocal line (Soprano) and a piano accompaniment. The score is written in common time (C) and includes various musical notations such as notes, rests, and dynamic markings (f, ff, crescendo, decrescendo). The vocal line is marked with a soprano clef and the piano line with a bass clef. The score is divided into measures by vertical bar lines, and the overall structure is organized into systems.

Figure 1 consists of two maps. Map A shows the location of the study area within the larger context of the Iberian Peninsula and the Mediterranean Sea. Map B shows the detailed location of the study area within the Iberian Peninsula, highlighting the study area in the south-eastern part of the peninsula.

(9) Musical score for voice and piano, measures 1-10. The key signature has one flat (B-flat). The tempo is marked "Allegretto". The score includes vocal lines and piano accompaniment with various dynamics like *f*, *ff*, and *sf*.

OPINION OF THE BOARD

The first part of the paper (Sections 1–3) is devoted to the study of the asymptotic behavior of the solutions of the problem (1)–(3) as $\epsilon \rightarrow 0$. In Section 1, we consider the case of a homogeneous medium, i.e., $\mu = 1$. In Section 2, we consider the case of a medium with a constant permeability μ . In Section 3, we consider the case of a medium with a variable permeability μ . The second part of the paper (Sections 4–6) is devoted to the study of the asymptotic behavior of the solutions of the problem (1)–(3) as $\epsilon \rightarrow 0$ for a medium with a variable permeability μ . In Section 4, we consider the case of a medium with a variable permeability μ and a variable conductivity σ . In Section 5, we consider the case of a medium with a variable permeability μ and a variable conductivity σ . In Section 6, we consider the case of a medium with a variable permeability μ and a variable conductivity σ .

Set out below is the text of a letter received from Gram Capital, the Independent Financial Adviser to the Independent Board Committee and the Independent Shareholders in respect of the Acquisition for the purpose of inclusion in the Circular.

Figure 1. The effect of the number of trials on the number of correct responses. The number of correct responses was plotted against the number of trials for each condition. The number of correct responses increased with the number of trials for all conditions. The number of correct responses was highest for the condition with the highest number of trials (10 trials) and lowest for the condition with the lowest number of trials (2 trials).

[illegible]

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The *Agrobacterium* strains were grown in the medium containing 100 mg/l of tetracycline. The cells were harvested at the stationary phase of growth and adjusted to the concentration of 10^8 cells/ml. The cells were then mixed with the plasmid solution and the mixture was used for the transformation of *Agrobacterium* strains. The transformation efficiency was determined by the number of transformants per 10^8 cells. The data are the mean $\pm$ SD of three independent experiments.

LETTER FROM GRAM CAPITAL

The first part of the paper is devoted to the study of the asymptotic behavior of the solutions of the system (1.1) as $\epsilon \rightarrow 0$. In the second part, we study the asymptotic behavior of the solutions of the system (1.1) as $\epsilon \rightarrow \infty$. In the third part, we study the asymptotic behavior of the solutions of the system (1.1) as $\epsilon \rightarrow 0$ and $\epsilon \rightarrow \infty$. In the fourth part, we study the asymptotic behavior of the solutions of the system (1.1) as $\epsilon \rightarrow 0$ and $\epsilon \rightarrow \infty$. In the fifth part, we study the asymptotic behavior of the solutions of the system (1.1) as $\epsilon \rightarrow 0$ and $\epsilon \rightarrow \infty$. In the sixth part, we study the asymptotic behavior of the solutions of the system (1.1) as $\epsilon \rightarrow 0$ and $\epsilon \rightarrow \infty$. In the seventh part, we study the asymptotic behavior of the solutions of the system (1.1) as $\epsilon \rightarrow 0$ and $\epsilon \rightarrow \infty$. In the eighth part, we study the asymptotic behavior of the solutions of the system (1.1) as $\epsilon \rightarrow 0$ and $\epsilon \rightarrow \infty$. In the ninth part, we study the asymptotic behavior of the solutions of the system (1.1) as $\epsilon \rightarrow 0$ and $\epsilon \rightarrow \infty$. In the tenth part, we study the asymptotic behavior of the solutions of the system (1.1) as $\epsilon \rightarrow 0$ and $\epsilon \rightarrow \infty$.

1. RESPONSIBILITY STATEMENT

The information contained in this report is true and correct to the best of our knowledge and belief, and we accept full responsibility for its accuracy and completeness. We have taken all reasonable steps to ensure that the information is true and correct, and we have no reason to believe that it is false or misleading. We have also taken all reasonable steps to ensure that the information is not false or misleading in any material particular.

2. INTERESTS AND SHORT POSITIONS OF DIRECTORS, SUPERVISORS AND CHIEF EXECUTIVES IN THE SHARES, UNDERLYING SHARES OR DEBENTURES OF THE COMPANY AND ITS ASSOCIATED CORPORATIONS

A search of the register of directors, supervisors and chief executives of the Company has been conducted to identify any interests or short positions in the shares, underlying shares or debentures of the Company and its associated corporations. The search has revealed that the following directors, supervisors and chief executives have interests or short positions in the shares, underlying shares or debentures of the Company and its associated corporations:

Mr. [Name] holds 7,800 shares of the Company, representing approximately 0.002% of the total issued shares of the Company. Mr. [Name] also holds 352 shares of the Company, representing approximately 0.0001% of the total issued shares of the Company.

| Name of Directors | Class of Shares | Nature of Interest | Number of Shares | Total Number of Shares | Approximate | Approximate |
|-------------------|-----------------|--------------------|------------------|------------------------|---|--|
| | | | | | Percentage in Shares of the Same Class ⁽¹⁾ | Percentage of the Company's Total Issued |

[illegible]

Figure 1 consists of three panels, A, B, and C, each showing a schematic representation of the experimental design. Panel A shows a timeline from 0 to 10 minutes. The timeline is divided into three segments: a 10-minute baseline (grey bar), a 10-minute intervention (red bar), and a 10-minute post-intervention period (white bar). Panel B shows a timeline from 0 to 10 minutes. The timeline is divided into three segments: a 10-minute baseline (grey bar), a 10-minute intervention (red bar), and a 10-minute post-intervention period (white bar). Panel C shows a timeline from 0 to 10 minutes. The timeline is divided into three segments: a 10-minute baseline (grey bar), a 10-minute intervention (red bar), and a 10-minute post-intervention period (white bar).

It is not clear whether the above results are due to the fact that the β values are estimated from the same data as the α values, or whether they are due to the fact that the β values are estimated from the same data as the α values. (The β values are estimated from the same data as the α values.)

8. INTERESTS AND SHORT POSITIONS OF SUBSTANTIAL SHAREHOLDERS IN THE SHARES AND UNDERLYING SHARES OF THE COMPANY

As at the end of the reporting period, the following persons held 33% or more of the issued shares of the Company or were known to the Company to have a substantial interest in the shares of the Company:

(a) **Substantial Shareholders:**

Mr. [Name] held 33% of the issued shares of the Company.

(b) **Short Positions:**

As at the end of the reporting period, no short positions were held in the shares of the Company.

(c) **Substantial Shareholders of the Company's Underlying Shares:**

As at the end of the reporting period, no substantial shareholdings were held in the underlying shares of the Company.

Figure 1 consists of three panels (A, B, and C) showing maps of the Amazon basin and surrounding regions. Panel A displays precipitation anomalies (mm) for three periods: 1997-1998 (top), 1998-1999 (middle), and 1999-2000 (bottom). Panel B displays the vegetation index (NDVI) for the same periods. Panel C displays the difference in vegetation index (NDVI) between 1997-1998 and 1998-1999. The maps show significant changes in precipitation and vegetation indices across the region, with a legend indicating the scale for each variable.

- ## 12. GENERAL

- 39

The following is the text of a letter and valuation certificate prepared for the purpose of incorporation in this circular received from Asia-Pacific Consulting and Appraisal Limited, an independent property valuer, in connection with its valuation as at 30 April 2026 of the property interests of the Group.

CONSULTING & APPRAISA
亞太評估

BASIS OF VALUATION

The basis of valuation is the fair market value of the property as of the date of valuation, based on the assumption that the property is being sold in the open market. The valuation is based on the best available information, including the physical characteristics of the property, the location, the condition, and the market conditions at the time of valuation.

METHODS OF VALUATION

The methods of valuation used in this report are the sales comparison method, the cost method, and the income method. The sales comparison method involves comparing the property to similar properties that have recently sold in the same area. The cost method involves estimating the cost to replace the property, less depreciation. The income method involves estimating the net income that the property can generate, and then applying a capitalization rate to that income.

VALUATION ASSUMPTIONS

The valuation is based on the following assumptions: the property is being sold in the open market; the property is in good condition; the property is being sold for cash; the valuation is based on the best available information; and the valuation is based on the fair market value of the property as of the date of valuation.

The valuation is based on the following assumptions: the property is being sold in the open market; the property is in good condition; the property is being sold for cash; the valuation is based on the best available information; and the valuation is based on the fair market value of the property as of the date of valuation.

VALUATION STANDARDS

The valuation is based on the following standards: the valuation is based on the fair market value of the property as of the date of valuation; the valuation is based on the best available information; the valuation is based on the physical characteristics of the property; the valuation is based on the location of the property; the valuation is based on the condition of the property; and the valuation is based on the market conditions at the time of valuation.

SOURCE OF INFORMATION

Warrant of Appointment, dated 19th March 2014, issued by the High Court of Hong Kong, in favour of the Valuer, for the purpose of valuing the Property for the purpose of the liquidation of the Company. The Valuer has conducted a visual inspection of the Property on 11th March 2014, and has obtained the necessary information from the Company's records and from the Valuer's own knowledge and experience.

DOCUMENT AND TITLE INVESTIGATION

The Valuer has conducted a visual inspection of the Property on 11th March 2014, and has obtained the necessary information from the Company's records and from the Valuer's own knowledge and experience.

AREA MEASUREMENT AND INSPECTION

The Valuer has conducted a visual inspection of the Property on 11th March 2014, and has obtained the necessary information from the Company's records and from the Valuer's own knowledge and experience.

The Valuer has conducted a visual inspection of the Property on 11th March 2014, and has obtained the necessary information from the Company's records and from the Valuer's own knowledge and experience.

The Valuer has conducted a visual inspection of the Property on 11th March 2014, and has obtained the necessary information from the Company's records and from the Valuer's own knowledge and experience.

CURRENCY

Appendix B is a table of the exchange rates of the Hong Kong dollar (HK\$) against the United States dollar (US\$).

The exchange rate of the Hong Kong dollar against the United States dollar is 1:1.
